Senior Software Engineer

Oracle India Pvt. Ltd. Hyderabad, Sept 2022 - Present

- Responsible for leading the design and development of new features, as well as maintaining and improving existing applications.
- Responsible for addressing customer defects, prioritize them based on their severity, and offer suitable solutions along with the appropriate eFix with the bundle releases.
- Produce and manage code standards for the bundle, as well as uphold Code Coverage reports and carry out SonarQube Analysis for every release.

Software Development Engineer

Oracle India Private Ltd Hyderabad (Netsuite), Nov 2019 – Sep 2022

- Assisted clients in streamlining their essential business operations by implementing a fully integrated system that covers ERP/financials, CRM, ecommerce, and inventory management.
- Oversaw the deployment of NetSuite ERP CRM Solutions across various domains, including Retail, Manufacturing, and Automobiles, at multiple international subsidiaries.
- Designed custom NetSuite forms, transaction PDFs, workflows, scripts, and roles to align with the company's channel structure and business rules.
- Developed reports, saved searches, and dashboards that offer comprehensive and forward-thinking Business Intelligence.
- Successfully delivered bundles for Netsuite, including Bill of Lading and Deductions & Chargebacks.

Software Development Engineer

Kony Pvt. Ltd. Hyderabad, Sept 2017 - Nov 2019

- Designed and built Marketplace 2.0 to achieve optimized performance, resulting in a Google Page Insight score of 95.
- Created a private marketplace with high security measures that allows customers to view and share components exclusively within their organization. Oversaw the entire design and development process.
- Designed and implemented an automation testing engine in Java that generates a daily report on the status of website and API tests. This effort resulted in an expanded customer base and improved product quality.
- Ensured responsiveness of the Kony Marketplace platform (https://community.kony.com/marketplace).

Associate Software Engineer

Kony Pvt. ltd. Hyderabad, Aug 2016 - Sept 2017

- Created a suite of automation tools for Windows-compatible devices, including mobile devices, tablets, and desktop applications, with automated code to streamline the process.
- Generated reports on coverage and addressed customer tickets pertaining to the Windows platform for both UWP and KIOSK.
